

I support satellite radio and OPPOSE HR 4026! We have a vacation home 60 miles south of the border in Mexico and it is a God send to finally have English speaking news and weather reports down there as well as when we're on the road. There could be a hurricane or tidal wave heading toward us in Mexico and we would not know, if you outlaw weather reporting. Please don't let the money and politicians sway you one more time.
